## Dow Jones Titans

---

### Overview

---

Dow Jones Titans Indices are designed to cover the biggest companies within a particular country, economic sector or geographical region. Dow Jones measures size by looking at market capitalization, revenue, net income and trading volume. Each index has less than 100 securities.

### Details

---

**Symbol Group:** DJ Titans Indices

**Publisher:** S&P Dow Jones Indices LLC

**Update Frequency:** Intraday or end-of-day (EOD)

**Online Source:** [www.djindexes.com](http://www.djindexes.com)

**Current Symbols:** [Catalog link](#)

### Characteristics

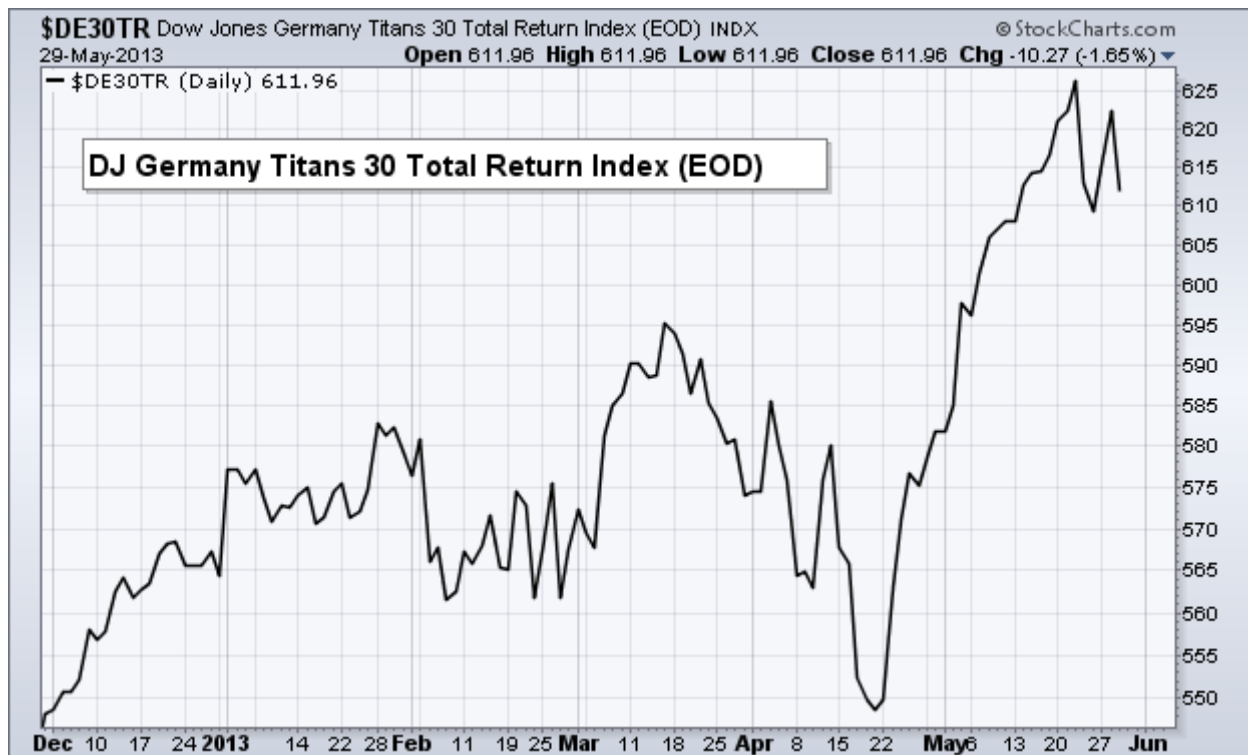

---

Some of these indices have the words “total return” in their name. A total return index includes any distributions, such as dividends, to provide a more realistic picture of investor return. Total return indices are usually updated end-of-day (EOD).

Intraday data is available for some of these indices, but others are updated after the close with end-of-day data (EOD). Indices based in the Far East tend to be end-of-day (EOD). Indices based in Europe tend to have intraday data. Check the symbol catalog and name for the update frequency. Names with “(EOD)” are updated after the market close.
