Market Indicators are datasets that contain meta data about the health of various markets or groups of related stocks. Examples include "Advancers," "Decliners," and the "McClellan Summation Index". A list of our important market indicators can be found below:

If you are new to market indicators, the following articles will help you get going:

- **Introduction to Market Indicators** - An in-depth introduction to popular market indicators found on StockCharts.com

- **Market Indicator Dictionary** - A list of ticker symbols for some of the more common market breadth indicators that we track on StockCharts.com
